SBMAC SpringerBriefs

The **SBMAC SpringerBriefs** series publishes relevant contributions in the fields of Applied Mathematics and Computational Sciences. Each volume consists of a concise monograph of 50 to 125 pages, intended to mathematicians and other scientists, as well as doctoral students in related areas. Briefs are characterized by fast, global electronic dissemination, standard publishing contracts, standardized manuscript preparation and formatting guidelines, and expedited production schedules.

This series welcomes the following types of submissions:

- An extended survey of an area
- An expansion and bridge between new research results, as published in journal articles
- A demonstration of core concepts that doctoral students must understand in order to make independent contributions
- Lecture notes making a specialized topic accessible to non-specialist
- A timely report of state-of-the-art techniques
- An in-depth case study
